| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | NUTF2 is a cytosolic factor that facilitates protein transport into the nucleus. It interacts with the nuclear pore complex glycoprotein p62 and Ran. This protein acts at a relative late stage of nuclear protein import, subsequent to the initial dock... |
| Molecular Weight           | 16.6                                                                                                                                                                                                                                                          |
| NCBI                       | <a href="#">005787</a>                                                                                                                                                                                                                                        |
| Purity                     | ~95% (SDS-PAGE).                                                                                                                                                                                                                                              |
| Form                       | Supplied as a liquid in 20mM Tris-HCl, pH 8.0, 10% glycerol.                                                                                                                                                                                                  |
