| Alternative Catalog Number | USB-P4074-04-100                                                                                                                                                                                                                                                |
| Manufacturer               | US Biological                                                                                                                                                                                                                                                   |
| Category                   | Molekularbiologie                                                                                                                                                                                                                                               |
| Product Description        | Positive control for cPLA2. The optimal molecular weight for 264.7 RAW is ~100kD without proteolysis. The full range for cPLA2 has been reported to be ~80-100kD. Recommended Dilutions: Mix with sample buffer, boil and run on a SDS gel. For best results... |
| Molecular Weight           | 85                                                                                                                                                                                                                                                              |
| Form                       | Supplied as a liquid in TBS, pH 7.5.                                                                                                                                                                                                                            |
