| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Potent and selective protein kinase C (PKC) inhibitor which binds to the active site of the kinase Sequence (linear): Arg-Phe-Ala-Arg-Lys-Gly-Ala-Leu-Arg-Gln-Lys-Asn-Val-His-Glu-Val-Lys-Asn-OH Amino Acid Analysis: Confirms expected sequence Peptide C... |
| Molecular Weight           | 2152                                                                                                                                                                                                                                                          |
| Purity                     | 95+% HPLC, Mass Spec                                                                                                                                                                                                                                          |
| Form                       | Supplied as a white to off-white lyophilized powder.                                                                                                                                                                                                          |
