| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Application                | ELISA, WB                                                                                                                                                                                                                                                     |
| Product Description        | E. coli derived recombinant protein containing the HIV-1 immunodominant regions from pol protein (reverse transcriptase) fused with a GST Tag at the N-Terminus Applications: Suitable for use in ELISA and Western Blot. Strongly reacts with human HIV p... |
| Purity                     | 95% (SDS-PAGE)                                                                                                                                                                                                                                                |
| Form                       | Supplied as a liquid in 25mM Tris-HCl, 1.5M urea, pH 8.0, 0.2% Triton-X, 50% glycerol.                                                                                                                                                                        |
