| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | RUNX3, also known as runt-related transcription factor 3, belongs to the RUNX family that regulate the expression of genes involved in cellular differentiation and cell cycle progression. A heterodimer of this protein and a beta subunit forms a compl... |
| Molecular Weight           | 17.1                                                                                                                                                                                                                                                          |
| NCBI                       | <a href="#">004341</a>                                                                                                                                                                                                                                        |
| Purity                     | ~95% (SDS-PAGE)                                                                                                                                                                                                                                               |
| Form                       | Supplied as a liquid in 20mM Tris-HCl, pH 8.0, 20% glycerol, 0.1M sodium chloride, 1mM DTT.                                                                                                                                                                   |
