| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | Cytosolic sulfotransferases catalyze the sulfonation of many hormones, neurotransmitters, drugs, and xenobiotic compounds. They are distinct from Golgi-resident sulfotransferases by the absence of transmembrane domains and are located in the cytoplas... |
| Molecular Weight           | 38                                                                                                                                                                                                                                                            |
