| Category                   | Molekularbiologie                                                                                                                                                                                                                                                     |
| Product Description        | Upon antigen challenge, T-helper cells differentiate into two functional distinct subsets, Th1 and Th2. Th1 cells produce IL-2, IFN- $\gamma$ and lymphotoxin-b that augment cell mediated immune response while Th2 cells secrete IL-4, IL-5, and IL-10 that enha... |
| Purity                     | Purified                                                                                                                                                                                                                                                              |
| Form                       | Supplied as a liquid in PBS, pH 7.2, 0.1% BSA, 0.02% sodium azide.                                                                                                                                                                                                    |
