| Immunogen                  | Amino-terminal fragment of Urokinase Plasminogen Activator.                                                                                                                                                                                                   |
| Product Description        | Urokinase Plasminogen Acitivator is a serine protease (SERPIN) that converts plasminogen into the active protease plasmin. uPA is secreted from cells as an inactive ~55kDa precursor which is activated to the two-chain form consisting of an A and B-ch... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [2Q486 10D7.2]                                                                                                                                                                                                                                                |
| Isotype                    | IgG2a                                                                                                                                                                                                                                                         |
