| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Application                | ELISA, WB                                                                                                                                                                                                                                                     |
| Product Description        | Control Peptide for V2121-86B (antiserum) and V2121-86C (affinity purified) Rat/Mouse VACHT are 530aa proteins with 12 transmembrane domains and a large intravesicular loop between TM1 and TM2. Twenty (20)aa peptide mapping within the C-terminus of r... |
| Purity                     | Highly purified                                                                                                                                                                                                                                               |
| Form                       | Supplied as a lyophilized powder from PBS, 0.05% sodium azide.                                                                                                                                                                                                |
