| Immunogen                  | WASF3 (AAH50283.1, 1-499aa) full-length human protein.                                                                                                                                                                                                        |
| Product Description        | This gene encodes a member of the Wiskott-Aldrich syndrome protein family. The gene product is a protein that forms a multiprotein complex that links receptor kinases and actin. Binding to actin occurs through a C-terminal verprolin homology domain i... |
| NCBI                       | <a href="#">50283</a>                                                                                                                                                                                                                                         |
| Purity                     | Purified.                                                                                                                                                                                                                                                     |
| Form                       | Supplied as a liquid in PBS, pH 7.2. No preservative added. Labeled with Fluorescein isothiocyanate (FITC).                                                                                                                                                   |
