| Category                   | Molekularbiologie                                                                                                                                                                                                                                             |
| Product Description        | SCRIPT RT-qPCR SybrMaster UNG is designed for quantitative real-time analyses of RNA templates using the fluorescent DNA stain SYBR Green. The ready-to-use mix is based on a genetically engineered reverse transcriptase with enhanced thermal stability... |
| Concentration              | 2x conc                                                                                                                                                                                                                                                       |
| Form                       | liquid                                                                                                                                                                                                                                                        |
| Application Notes          | Application Notes: Spectroscopic Propertie: lambdaexc 494 nm (bound to DNA), lambdaem 521 nm, (bound to DNA)                                                                                                                                                  |
