| Immunogen                  | Recombinant full-length human Histone H1 protein                                                                                                                                                                                                              |
| Product Description        | Eukaryotic histones are basic and water-soluble nuclear proteins that form hetero-octameric nucleosome particles by wrapping 146 base pairs of DNA in a left-handed super-helical turn sequentially to form chromosomal fiber. Two molecules of each of th... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
