| Category                   | Antikörper                                                                                                                                                                                                                                                                                                                                                 |
| Application                | ELISA                                                                                                                                                                                                                                                                                                                                                      |
| Product Description        | Specificity: HA-1E10 activity is directed against the hemagglutinin head of Influenza A virus. Antigen Distribution: Hemagglutinin is present on the influenza viral surface. Background: Influenza A causes large numbers of infections and deaths annual...                                                                                              |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                                                                                                                 |
| Clone Designation          | [HA-1E10]                                                                                                                                                                                                                                                                                                                                                  |
| Purity                     | Purity :>90% monomer by analytical SEC and SDS-PagePreparation : Recombinant antibodies are manufactured in an animal free facility using only in vitro protein free cell culture techniques and are purified by a multi-step process including the use of protein A or G to assure extremely low levels of endotoxins, leachable protein A or aggregates. |
| Target                     | Flu A, HA                                                                                                                                                                                                                                                                                                                                                  |
