## Product Datasheet

### Anti-Influenza A, HA (Clone: Flu-5J8) Purified No Carrier Protein, Clone: [Flu-5J8], Monoclonal ABI-12-8439

|                            |                                                                                                                                                                                                                                                                                                                                                             |

| Application                | ELISA                                                                                                                                                                                                                                                                                                                                                       |
| Product Description        | Specificity: Flu-5J8 activity is directed against a conserved H1 epitope adjacent to the receptor binding site domain on the HA globular head. Furthermore, clone Flu-5J8 binds HA using receptor mimicry3. By inserting its HCDR3 into the HA receptor bi...                                                                                               |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                                                                                                                  |
| Clone Designation          | [Flu-5J8]                                                                                                                                                                                                                                                                                                                                                   |
| Purity                     | Purity :>=90% monomer by analytical SEC and SDS-PagePreparation : Recombinant antibodies are manufactured in an animal free facility using only in vitro protein free cell culture techniques and are purified by a multi-step process including the use of protein A or G to assure extremely low levels of endotoxins, leachable protein A or aggregates. |
| Target                     | Flu A, HA                                                                                                                                                                                                                                                                                                                                                   |
