| Immunogen                  | Peptide sequence around aa.188~192 (G-L-S-P-A) derived from Human Progesterone Receptor.                                                                                                                                                                       |
| Product Description        | Progesterone receptors (PRs) are nuclear hormone receptors of the NR3C class, which also includes mineralocorticoid, glucocorticoid and androgen receptors. They exist as homodimers coupled to Hsp90 or HMGB proteins, which are shed upon activation. The... |
