| Immunogen                  | Peptide sequence around aa.323~327 (E-N-S-N-F) derived from human Fas .                                                                                                                                                                                       |
| Product Description        | Receptor for TNFSF6/FASLG. The adapter molecule FADD recruits caspase-8 to the activated receptor. The resulting death-inducing signaling complex (DISC) performs caspase-8 proteolytic activation which initiates the subsequent cascade of caspases (asp... |
