| Immunogen                  | Peptide sequence around aa. 698~702 (T-E-Y-M-T) derived from Human c-Cbl.                                                                                                                                                                                     |
| Product Description        | Participates in signal transduction in hematopoietic cells. Adapter protein that functions as a negative regulator of many signaling pathways that start from receptors at the cell surface. Acts as an E3 ubiquitin-protein ligase, which accepts ubiquit... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
