| Immunogen                  | Recombinant human full-length FAF1 protein                                                                                                                                                                                                                    |
| Product Description        | In contrast to growth factors which promote cell proliferation, FAS ligand (FAS-L) and the tumor necrosis factors (TNFs) rapidly induce apoptosis. Cellular response to FAS-L and TNF is mediated by structurally related receptors containing a conserved... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
