| Immunogen                  | Human CD16 protein                                                                                                                                                                                                                                |
| Product Description        | It recognizes CD16 (FcγR3), the low-affinity receptor for IgG with an apparent molecular weight of 50-80kDa. Two similar genes represent CD16, CD16A (FcγR3A), which exists as a hetero-oligomeric polypeptide-anchored form in macrophages an... |
