| Immunogen                  | Recombinant fragment of human GZMB protein (around aa 73-187) (exact sequence is proprietary)                                                                                                                                                                 |
| Product Description        | Granzyme B is a member of the granule serine protease family stored specifically in NK cells or cytotoxic T cells. Cytolytic T lymphocytes (CTL) and natural killer (NK) cells share the ability to recognize, bind, and lyse specific target cells. They ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Clone Designation          | [GZMB/3056]                                                                                                                                                                                                                                                   |
