| Immunogen                  | Chicken gizzard tropomyosin.                                                                                                                                                                                                                                  |
| Product Description        | The tropomyosins are a family of actin filament binding proteins. These proteins were first isolated from skeletal muscle, but later identified in many nonmuscle tissues. Tropomyosins are ubiquitous proteins of 35 to 45 kD associated with the actin f... |
