| Category                   | Biochemikalien                                                                                                                                                                                                                          |
| Product Description        | ATP-citrate lyase (ACL, EC 4.1.3.8) is a key enzyme in fatty acid synthesis. The acetyl-CoA produced by its catalysis can be used for fatty acid synthesis, carbon chain elongation, flavonoid synthesis, amino acid synthesis, etc.... |
