| Category                   | Antikörper                                                                                                                                                                                                                                                         |
| Product Description        | The reactivity of the antiserum is directed to the surface and hidden determinants of Ig kappa light chain. In immunoelectrophoresis this antiserum is reacting with polyclonal and monoclonal immunoglobulins of the kappa type, Bence Jones proteins as ...      |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                         |
| Clone Designation          | [Polyclonal]                                                                                                                                                                                                                                                       |
| Buffer                     | Purified hyperimmune sheep IgG lyophilized from a solution in phosphate buffered saline (pH 7.2). No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water, spun down to remove insoluble |
| Source                     | A pool of purified Bence Jones kappa proteins isolated from mouse urine. Freund's complete adjuvant is used in the first step of the immunization procedure.                                                                                                       |

|                   |                                                                                                                                                                          |
