## Product Datasheet

### Anti-HLA-DR/DP Alexa Fluor 700, Clone: [MEM-136], Monoclonal EXB-A7-296-T025

|                            |                                                                         |
|----------------------------|-------------------------------------------------------------------------|
| Article Name               | Anti-HLA-DR/DP Alexa Fluor 700, Clone: [MEM-136], Monoclonal            |
| Biozol Catalog Number      | EXB-A7-296-T025                                                         |
| Supplier Catalog Number    | A7-296-T025                                                             |
| Alternative Catalog Number | EXB-A7-296-T025                                                         |
| Manufacturer               | EXBIO                                                                   |
| Category                   | Antikörper                                                              |
| Application                | FC                                                                      |
| Species Reactivity         | Human                                                                   |
| Immunogen                  | PHA-activated peripheral blood lymphocytes.                             |
| Conjugation                | Alexa Fluor 700                                                         |
| Clonality                  | Monoclonal                                                              |
| Clone Designation          | [MEM-136]                                                               |
| Isotype                    | IgG1                                                                    |
| Buffer                     | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide |
| Storage                    | 2°C to 8°C                                                              |
| Antibody Type              | Monoclonal Antibody                                                     |

Application Notes

Flow cytometry: The reagent is designed for analysis of human blood cells using 4 µl reagent / 100 µl of whole blood or 10<sup>6</sup> cells in a suspension. The content of a vial (0.4 ml) is sufficient for 100 tests.
