| Manufacturer               | ImmunoChemistry Technologies                                                                                                                                                                                                                                  |
| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | Granulocyte-macrophage colony-stimulating factor (GM-CSF) is a protein secreted by macrophages, T cells, mast cells, NK cells, endothelial cells and fibroblasts. GM-CSF stimulates stem cells to produce granulocytes (neutrophils, eosinophils, and baso... |
| Molecular Weight           | 14.5 kDa                                                                                                                                                                                                                                                      |
| Source                     | Yeast                                                                                                                                                                                                                                                         |
| Form                       | Lyophilized                                                                                                                                                                                                                                                   |
| Application Notes          | Format: Recombinant proteins produced in yeast                                                                                                                                                                                                                |
